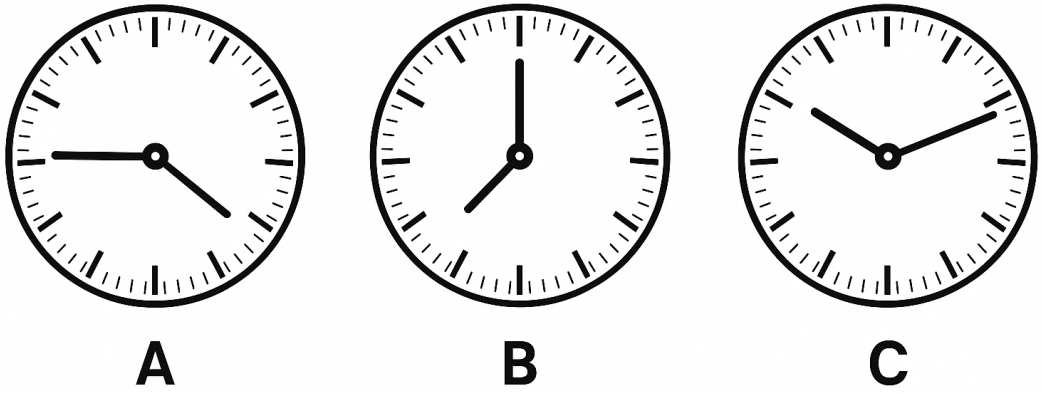
Time — Build Tasks



1. Read clock A. Write the time in words and in digital 24-hour format.

2. Read clock B. What is the time 35 minutes later? Write your answer in analogue terms and digital format.

3. Read clock C. A train departs at the time shown and takes 2 hours 15 minutes. What time does it arrive?

4. Read clock G and clock H. What is the time difference between G and H in hours and minutes?

5. If an event starts at clock G's time and runs for the difference you calculated in Q4, what time will it finish (24-hour)?

6. The digital panel shows 11:20. Convert that to analogue, and explain whether it matches clock H.

7. A digital clock shows 23:45. What is this in 12-hour time?

8. A flight leaves at 06:50 and arrives at 09:15. How long is the flight?
